

Extrusion Solutions

The Difference in Custom Manufacturing

Custom Extrusion

PRECISION-HAYES International supplies a diverse range of superior quality extrusion products and services to customers world-wide. Since 1992, we have built our reputation on exceeding the individual requirements of those valued customers.

Capabilities

With unique capabilities in extrusion and plastic coating, we can process diameters from 1/8 inch up to 3 inches. We specialize in quick turn-around and low cost extrusions. **PRECISION-HAYES International** also offers jacketing printing, which can be used for product identification, line marking, lot control and more.

Applications Include:

- Chemical Injection
- T.E.C.
- Fiber Optics
- Downhold Control
- Downhole Monitoring
- Wire Rope

Jacketing Materials Include:

- TPR
- PVC
- Fluoropolymers (PVDF, Halar)
- Polyethylene
- Polyurethane
- Nylon

Special Services Include:

- Quick Turn-Arounds
- Custom Profiles
- Custom Line Marking
- No Minimum Length Requirement
- Custom Packaging
- Product Identification

Extrusion/Custom Coating

Custom Manufacturing

We design and manufacture all types of custom extrusions and cabling for a variety of industries including: oil, defense, petrochemical, communication, geophysical, marine, high temperature and fiber optics. We've built a solid reputation as harsh environment specialists and enjoy a leadership role in the industry.

Short runs, tight lead times, unique product requirements, or complex designs are not an issue. We have no minimum length requirement and with multiple take-up and pay-off systems available, we can accommodate most cable and tubing.

Delivery

Even the most complex cable assemblies can be delivered in just 2-3 weeks (industry standard is 8-10 weeks). Meeting and exceeding the individual needs of each and every customer is what we constantly strive for and where we will not compromise.

Additionally, we manufacture the highest quality standard products that can be stocked at our warehouse with a blanket purchase order. We will cut your cable to specified lengths and deliver it to you quickly. This allows for the security and convenience for you to know product can be delivered from your stock when and where you need it.

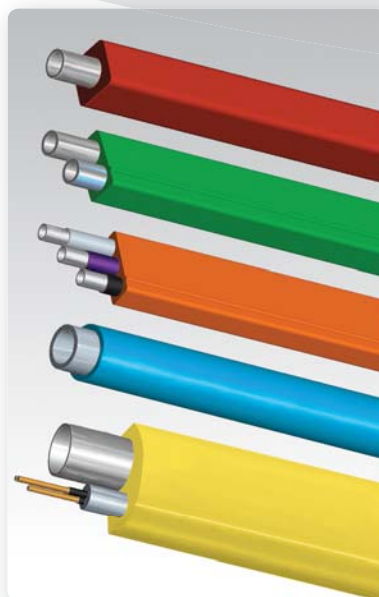

Single Tube (Square)

Dual Tube (Flat)

Multi Tube (Flat)

Single Tube (Round)

Multi Tube (Hybrid)

Insulations:

Teflon, PVC, Polyethylene, polypropylene and more

Cabling:

Twisted Pairs, triads, quads, multi-component assemblies

Shielding:

Aluminum, mylar, braided tinned copper

Jacketing:

Neoprene, polyurethane, polyethylene, thermoplastic rubber
