---

August 18, 2017

Per the PTI M-10 specification and the CRT-20 plant certification standard, many customers have requested information from us to ensure the resin we use in producing our encapsulated anchor system complies with the updated UV protection guidelines.

Posi-Lock and Posi-Lock Plus anchorages and components are produced with resin that is performance rated to **UV15, or up to 15,000 hours exposure in a xenon-arc weatherometer.**

Please feel free to contact us with any questions or further requirements.

Thanks.

A handwritten signature in grey ink, appearing to read "Jim Norlin", is positioned below the "Thanks." text.
